ABOUT ME

After working almost every job in the restaurant I decided to pursue a career in software development. My skills problem solving, and adapting on the fly in a high paced team environment have helped guide my decision to enter the programming world.

TECHNICAL EXPERIENCE

Software Developer

Nashville Software School | 2021-Present

An intensive, six-month full-time program teaching the skills and technologies necessary to become a full-stack software developer.

- Git & Github version control
- Remote project collaboration
- ERDs, dependency charts, wireframe design
- Developing applications using popular tech stacks that include JavaScript, React, HTML5, and CSS

SKILLS & LANGUAGES

- Javascript
- React
- Npm
- Sql
- Python
- Java
- Reactstrap
- Bootstrap
- HTML
- CSS
- JSON

PROJECTS

Dueling Dinner

Personal Single Page Web App

FrontEnd Capstone project designed to help two people decide on dinner. Built with React and Json server to store data. The Yelp fusion api was used to get data on restaurants. 

Daily Journal

Personal Single Page Web App

Daily Journal is a personal project built with React front end and python/sqlite as the backend data storage. The app helps track of journal entries with functionality to sort by mood or content in the entry.
