Nashville Software School

January 4th, 2021 - June 26th 2021

Nashville, Tn

SKILLS

JavaScript (ES6, React, Node.js)

GIT/GitHub

HTML/CSS/Vanilla JS

API's/JSON

CAREER OBJECTIVE

I have had a passion for technology since I was just a kid, first coding on my Myspace page. My coding journey flourished when I began teaching myself how to code through online courses. After 6 months of independent study, I decided to enroll in Nashville Software School in order to advance my knowledge and network. My experience in software development has given me insight into the coding world that I would not have been able to get anywhere else. I am thankful for the opportunities that have been provided to me thus far and am excited for the path that lies ahead.

WORK EXPERIENCE

Driver Apprentice

Performance Food Group Co

December 2019 - January 2021 / Lebanon, TN

- Worked alongside senior team members to learn all related job tasks and roles starting typically at 1 A.M. and ending around 2 P.M.
- Utilized local road knowledge and GPS software to map routes and specific locations to help save time and efficiently use time.
- Worked closely with the product team to re-configure the process of unloading trucks as well as loading trucks to maximize efficiency in regards to unloading the items at deliveries.
- Nick named the "All Star" since you could call me anytime and I'd come in, a lot like the infamous meal at Waffle House.

Restaurant Server at Bon Fire Hibachi

Bon Fire Hibachi

January 2019 - December 2019 / Mount Juliet, TN

- Updated repeat customers on menu changes and new food and beverage offerings to maintain quality service relationships.
- Increased sales of high margin menu items through effective upselling
- Assisted customers in selecting appetizers, entrees and desserts and recommended alternative items for food allergies and gluten intolerances.
- Educated guests on daily specials and appetizers, entrees, desserts and other menu items.

PROJECTS

Kennels

- Kennels is a single page application built with React to allow users to be able to add their dog to the kennel that is closest to their home, look through multiple locations, remove their dog off a list, and edit anything they have created as a user.
- Full CRUD functionality using React Hooks to manage state
- JSON Server used as a local database
- GitHub Repo - https://github.com/Ccourter11/kennels

Train Right

- Train Right is an application catered to the average person who is looking to workout but not necessarily looking to go to the gym. Train Right is a CRUD App that allows users to Create workouts, update existing workouts and delete specific workouts. It also has a search functionality that I implemented with React Hooks from scratch.
- Full CRUD MVP application built with React
- Styled CSS with React Bootstrap
- GitHub Repo - https://github.com/Ccourter11/Train-Right
